Prospective applicants for shares should inform themselves as to the legal requirements and consequences of applying for, holding and disposing of shares and any applicable exchange control regulations and taxes in the countries of their respective citizenship, residence or domicile.

This document does not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer is not qualified to do so to anyone to whom it is unlawful to make such offer or solicitation.

Persons interested in acquiring funds should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile; (ii) any foreign exchange controls; and (iii) any relevant tax consequences. VAM Funds (Lux) is not registered under any US securities law, and their funds may not be offered or sold in the USA, its territories or possessions, nor to any US persons. VAM Funds (Lux) funds are not offered for sale in any jurisdiction in which they are not authorised to be publicly sold. The funds are available only in jurisdictions where their promotion and sale are permitted. For the purposes of UK law, funds are recognised schemes under section 264 of the Financial Services & Markets Act 2000. The protections provided by the UK regulatory system, for the protection of retail clients, do not apply to offshore investments. Compensation under the UK's Financial Services Compensation Scheme will not be available and UK cancellation rights do not apply. The funds are authorised by the Financial Conduct Authority in the UK.

Applicants are assumed to have read and understood the prospectus and accept the risks of an investment in VAM Funds (Lux). In particular, it is understood that they are aware that the portfolio of securities relating to each of the sub-funds of VAM Funds (Lux) is subject to market fluctuations and to the risks inherent in all investments, and that the price of shares and any income from the shares may go down as well as up, and that the sub-funds of VAM Funds (Lux) may be subject to volatile price movements which may result in capital loss.

Past performance is not necessarily a guide to future performance. No guarantee is provided, either with respect to the capital or the return of the fund. The value of participatory interests or the investments may fluctuate in value and may fall as well as rise. Changes in the rates of exchange may also cause the value of a portfolio to rise or fall. An investor may not receive back the amount of its investment. Actual investment performance will differ based on the initial fees' charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax.

VAM Global Management Company SA (the "Management Company") ensures that reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date net asset value ("NAV") price of the applicable class of the fund, irrespective of the actual reinvestment date.

Performance figures quoted for the fund are from Lipper for Investment Management as at the date of this document for a lump sum investment, using NAV to NAV with income reinvested, and do not take any upfront manager's charge into account.

The Management Company ensures that publishing of performance of a portfolio is based on performance calculations which are done on a NAV to NAV basis over all reporting periods, provided that, where a NAV is not available, the value used to calculate the performance is clearly stated and a description of how the figures were calculated is provided.

Investments in foreign securities may include additional risks such as potential constraints on liquidity and repatriation of funds, macro-economic risk, political risk, foreign exchange risk, tax risk and settlement risk, as well as potential limitations on the availability of market information.

The risk and reward indicator illustrates where the fund is positioned in terms of its possible risk and reward. The higher the fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data which cannot be used as a prediction for the future. Therefore, the risk classification may change over time. Even if the fund is in the lowest risk class, an investor can lose money, as no investments are entirely risk-free.

The risk and reward indicator has been calculated using simulated historical performance data (only where applicable) which may not be a reliable indicator of the fund's future risk and reward profile.
