### Fund Objective

The Alquity Indian Subcontinent Fund is equity focused and targets attractive risk-adjusted returns over the long-term by investing in public companies across the Indian Subcontinent. Our portfolio emphasizes long-term themes, transparency and alignment of management. This is achieved by a fundamental process which incorporates both financial valuation and ESG analysis of material non-financial factors.

### Monthly Highlights

Markets were highly volatile during March, due to the war in the Middle East.

Indian consumer price inflation (CPI) remained well-controlled at 3.21% (February, year on year).

Bank credit grew 14.5% in February (year on year).

During the month, we exited Dabur and Ion Exchange. We initiated a position in Meesho (e-commerce).

### Stock of the Month

Meesho is India's largest e-commerce platform by order volume and is uniquely positioned to capture the under-penetrated e-commerce market across smaller cities and beyond. The company utilises a disruptive asset-light, zero-commission marketplace model that monetises through high-margin advertising and delivery services. Meesho's sustainable competitive advantage is rooted in its massive network effects and delivery cost leadership, which significantly undercut traditional e-commerce players. Our analysis was supported by a proprietary consumer panel interview conducted with our Transforming Lives partner, Phool, in Kanpur. We assign Meesho a C grade within our proprietary ESG rating system.
