Contact: +352 25 10 33 20

The Fund is authorized in Luxembourg and manufactured by Limestone Platform AS.

This key information document is valid as at 25 July 2025.

What is this product?

Type:

Société d'Investissement à Capital Variable [SICAV]

Term:

This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives:

The sub-fund aims to achieve long-term capital appreciation for investors, by investing in Asian securities. The sub-fund promotes, among others, environmental, social and/or governance characteristics within the meaning of article 8 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector. The aim of the sub-fund is long term capital appreciation by investing at least two-thirds (2/3) of its net assets in: equity securities listed on the regulated Markets of India, Pakistan, Sri Lanka and Bangladesh (collectively the Region); equity securities listed on the Regulated Markets outside of the Region whose issuers either have more than 50% of their assets, or have realized more than 50% of their revenue, net income and/or operating profit, in the Region.

The sub-fund invests into Indian securities primarily by way of the Foreign Institutional Investor licensed status of the Investment Manager granted to it by the Indian securities regulator.

The sub-fund will mainly invest, directly or indirectly, in equities.

The sub-fund may also invest in assets such as bonds, Money Market instruments, time deposits, derivatives instruments etc.

The sub-fund may, on an ancillary basis, hold cash and equivalents and, under exceptional circumstances (e.g. the global financial crisis of 2008 or Asian financial crisis of 1998), the sub-fund may also be invested up to 100% in cash and cash equivalents. The sub-fund is unconstrained, with a thematic process that incorporates ESG (environmental, social, governance) and impact analysis. The ESG analysis eliminates over 20% of potential stocks that have passed our thematic filter. Furthermore, in order to meet our desired portfolio characteristics and tracking error, we may optimise the portfolio with reference to a relevant index. It is our intention that the investments contained within the sub-fund will collectively emit lower GHG and use less water than the relevant index.

Intended Retail Investor:

Intended retail investor The sub-fund is suitable for investors who are prepared to accept a high level of risk and who plan to maintain their investment over a medium to long term period. Note: For reference only, investors should consider their own specific circumstances, including, without limitation, their own risk tolerance level, financial circumstances and investment objectives prior to investing in the sub-fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for a minimum of 5 Years. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks: Currency risk, emerging and Frontier markets risk, derivatives, liquidity risk, operational risk, legal or tax risk, ESG risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund completed where applicable by that of its reference framework over the last 10 years.

Recommended minimum holding period: 5 Years Investment: 10 000 EUR			
Scenarios		1 Year	5 Years (recommended holding period)
Stress scenario	What you might get back after costs	NaN EUR	NaN EUR
	Average return each year	NaN %	NaN %
Unfavourable scenario	What you might get back after costs	NaN EUR	NaN EUR
	Average return each year	NaN%	NaN%
Moderate scenario	What you might get back after costs	NaN EUR	NaN EUR
	Average return each year	NaN%	NaN%
Favourable scenario	What you might get back after costs	NaN EUR	NaN EUR
	Average return each year	NaN%	NaN%

The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between -- SHARE_CLASS.Publish_EU_Perf_Calc_First_NAV_Benchmark_Date Is Empty -- - - SHARE_CLASS.Publish_EU_Perf_Calc_Last_NAV_Benchmark_Date Is Empty --.

What happens if Limestone Platform AS is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Caceis Bank, Luxembourg Branch. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years
Total Costs	NaN EUR	NaN EUR
Annual Cost Impact	NaN %	NaN %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -- SHARE_CLASS.PRIIPS_ENT_I_V2_PERIOD_3 Is Empty --% before costs and -- SHARE_CLASS.PRIIPS_ENT_R_V2_PERIOD_3 Is Empty --% after costs.

These figures include the maximum distribution fee that the person selling you the product may charge ([] % of amount invested / [] EUR). This person will inform you of the actual distribution fee.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 Year
Entry costs		None
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	None
Ongoing costs		
Management fees and other administrative or operating costs	1.90% of the value of your investment per year. The Ongoing Charges figure presented is based on estimated costs for the forthcoming financial period, using available data and reasonable assumptions regarding the expected level of fund expenses. As such, it is a projection and may be subject to change. The actual charges incurred by the fund may differ from this estimate. The figure will be reviewed and updated as more up-to-date information becomes available, in accordance with applicable regulatory requirements.	NaN EUR
Portfolio transaction costs	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	NaN EUR
Incidental costs taken under specific conditions		
Performance Fee	There is no performance fee for this product.	None

How long should I hold it and can I take money out early?

Recommended minimum holding period: 5 Years

Recommended holding period: 5 years
