Contact: +352 25 10 33 20

The Fund is authorized in Luxembourg and manufactured by Limestone Platform AS.

This key information document is valid as at 12 February 2026.

What is this product?

Type:

Société d'Investissement à Capital Variable [SICAV]

Term:

This product is not subject to any fixed terms.

Objectives:

The investment objective of the Compartment is to achieve significant capital appreciation over each full market cycle. The Compartment is actively managed, mainly investing in stocks of companies from around the world (including emerging markets), with a market capitalization greater than USD 1 billion at the time of purchase, although the Compartment may invest in companies with lower market capitalizations if market conditions suggest doing so will help the Compartment achieve its objective. The strategy of the Compartment is growth oriented, this means it identifies and invests in stocks of companies with perceived future earnings growth potential. In addition, the Compartment may hold bank deposits as well as invest in bonds issued by companies or governments and money market instruments. In order to achieve its objectives, the Compartment may use derivatives to reduce the impact that the market changes might have on the Compartment performance. In principle you can sell shares of the Compartment on every full bank business day. Income remains in the Compartment and is reinvested.

Intended Retail Investor:

The sub-fund is suitable for investors who are prepared to accept a high level of risk and who plan to maintain their investment over a medium to long term period. Note: For reference only, investors should consider their own specific circumstances, including, without limitation, their own risk tolerance level, financial circumstances and investment objectives prior to investing in the sub-fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for a minimum of 5 Years. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund completed where applicable by that of its reference framework over the last 10 years.

Recommended minimum holding period: 5 Years Investment: 10 000 USD			
Scenarios		1 Year	5 Years (recommended holding period)
Stress scenario	What you might get back after costs	3 180 USD	2 420 USD
	Average return each year	- 68.2 %	- 24.7 %
Unfavourable scenario	What you might get back after costs	6 930 USD	8 590 USD
	Average return each year	- 30.7%	- 3.0%
Moderate scenario	What you might get back after costs	9 960 USD	12 100 USD
	Average return each year	- 0.4%	3.9%
Favourable scenario	What you might get back after costs	14 990 USD	14 480 USD
	Average return each year	49.9%	7.7%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 12/2024 and 01/2026.

Moderate: This type of scenario occurred for an investment between 04/2019 and 03/2024.

Favourable: This type of scenario occurred for an investment between 03/2016 and 02/2021.

What happens if Limestone Platform AS is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Caceis Bank, Luxembourg Branch. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment: 10 000 USD	If you exit after 1 Year	*If you exit after 5 Years
Total Costs	824 USD	2541 USD
Annual Cost Impact	8.2 %	4 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.93% before costs and 3.89% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 Year
Entry costs	0.00% of the amount you pay in when entering this investment. No entry costs are charged to you.	None
Exit costs	5.00% of your investment before it is paid out to you.	526 USD
Ongoing costs		
Management fees and other administrative or operating costs	2.65% of the value of your investment per year. This is an estimate based on actual costs over the last six months.	287 USD
Portfolio transaction costs	0.10% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	11 USD
Incidental costs taken under specific conditions		
Performance Fee	There is no performance fee for this product.	None

How long should I hold it and can I take money out early?

Recommended minimum holding period: 5 Years
