

VAM MANAGED FUNDS (LUX) - VAM BALANCED FUND (EUR)

A CLASS – JULY 2023

Marketing communication / Financial promotion

Objective and Investment Policy

The investment objective of the Compartment is to provide a total return through a combination of income and capital growth. This objective is pursued by exposure to equities and similar securities, fixed income instruments (including convertible instruments) and/or money market instruments on a worldwide basis.

There can be no assurance that the investment objective will be achieved or that there will be a return on capital.

Key Features

- Discretionary core balanced growth portfolio with exposure primarily to a concentrated portfolio of listed global equities
- Buys direct equities instead of a fund-of-funds approach to improve stock selection and provide investor transparency
- Fixed income and alternative asset exposure to provide diversification and reduce volatility/manage risk

Profile of Typical Investor

The Compartment is suitable for investors seeking long-term growth through capital appreciation. It is also suitable for investors wishing to diversify their investment portfolios, who are comfortable with and understand the risks of investing in the stock market, who have an investment horizon of at least five to seven years, and who seek balanced investment opportunities in the global markets.

Risk and Reward Profile

This risk and reward indicator illustrates where the Class is positioned in terms of its possible risk and reward. The higher the Class's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore, the risk classification may change over time. Even if the Class is in the lowest risk class you can lose money, as no investments are entirely risk-free.

The risk and reward indicator has been calculated using simulated historical performance data, which may not be a reliable indicator of the Class's future risk and reward profile.

This Class is in category 5 since the price changes of the Class have been moderate in the past.

Main inherent risks of the Compartment:

Liquidity risk: Some of the assets of the Compartment may become difficult to sell at a certain time and for a reasonable price.

Interest risk: The Compartment invests in bonds, whose value is affected by changes in the interest rates.

Currency risk: The Compartment invests in securities that are issued in currencies other than the base currency of the Compartment. As a result, the Compartment is subject to currency risk, which arises from changes in the exchange rates between countries.

Derivative risk: The Compartment uses derivatives, which are financial instruments whose value depends on the value of an underlying asset. Small price changes in the underlying asset can result in large price changes of the derivative.
